We take care of your most valuable assets:
YOUR EMPLOYEES

FAMILY; THEIR WELFARE IS IMPORTANT

Very often, the **spouse** left behind his/her job in order not to break the family core and once in the new country, he/she has to find a house, school, insurances, banks, visas, residence permits and all this while he/she manages to have the telephone or electricity installed, not mentioning the basic daily tasks.

About the **children**, it hasn't been easy saying goodbye to their friends, changing school and probably language and climate. All these facts make the employee feel stressed when thinking about all the unattended situations that might arise to his family while he/she is out, even on a short business trip.

We care about your little ones, that's why we know **where to take them** to be seen by a pediatrician, where to find a clown for their birthday party or where to have fun in case of teenagers.

We care about you, that's why we know what restaurant to recommend for dinner while we look for a well referenced babysitter. We can prepare a holiday by the seaside so you relieve all the stress after moving or we can organize a catering to celebrate your wedding anniversary.
